

KONE Villa 100

Enhancing your living experience

KONEVilla 100 brings you a safe and comfortable riding experience. It reduces noise pollution and can adjust the speed according to comfort requirements. The 220V single-phase power supply and 1.1kW drive system consume significantly less power than general household appliances.

- 01** In the event of power failure, the emergency lighting in the car is switched on and the lift switches to the back-up power source.
- 02** The lift will automatically travel to the nearest floor, doors will open and passengers can exit safely.
- 03** The lift will resume normal operation when electricity is back on.
