Planning Guide

KONE TranSys™ DX
Speed 0.5 - 1.6 m/s
Rated load 1600 - 5000 kg

Dedicated to
People Flow™

Configuring your elevator shaft

Configure your elevator to match your unique requirements. Please contact us directly if you have a challenge with the elevator shaft headroom or pit depth of your project. Please be aware what function your elevator is to perform, and contact us for any specialist applications to ensure all requirements are correctly covered.

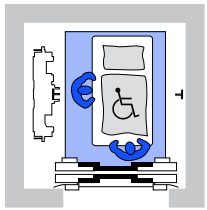

All dimensions conform with EN 81-20/50 and are in mm unless otherwise stated. All figures shown assume the elevator shaft wall is either concrete, masonry or blockwork with a minimum standard of thickness and strength. All information is for project planning purposes only. Please contact us for verified dimensions for your specific project. Subject to change without notice.

Door types and maintenance panel

The selection of elevator doors plays a crucial role in both performance and aesthetics. We provide door systems tailored to various needs and preferences.

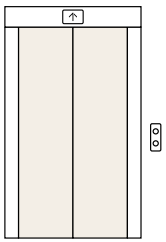

This planning guide includes shaft dimensions for the most common car dimensions with KES 800. If you have specific car dimensions in mind for your project, feel free to contact us.

Door type	Door duty
KES 800	Up to 800,000 starts per year

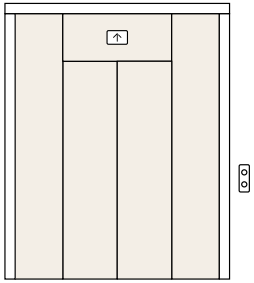

Technical specifications	
Door opening	Side / Centre opening
Door height [mm]	2000/2100/2200/2300/2400/2500/2600 /2700/2800/2900/3000
Door width [mm]	900/1000/1100/1200/1300/1400/1500/1600/1700/1800/1900/2000/2000/2100/2200/2300/2400/2500/2600/2700/2800/2900

KES 800 with narrow frame (width 50 mm all-round)

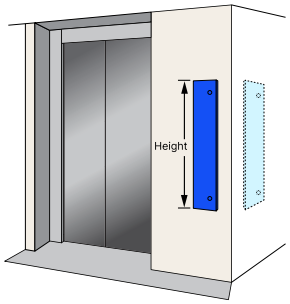

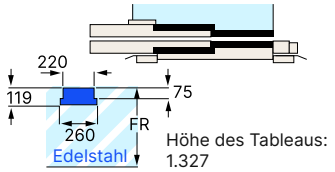

KES 800 with frame (120 mm side and 150 mm top)

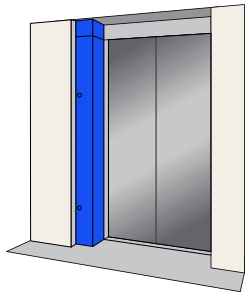

KES 800 with front door

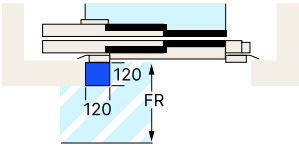

Wall-mounted maintenance panel

Door-mounted maintenance panel

Technical specifications

- Placement in the topmost floor. Option: Can be moved up to 18 m below the topmost floor
- Always located on the motor side
- Minimum 700 mm required for maintenance and 1 200 mm in public use areas
- Door-mounted panel only available for front door and frame door with minimum 120 mm width
- Wall-mounted panel also available on the side wall of the shaft

Successful planning with KONE

Whether you project involves a new build, conversion, modernization or operation, you can be assured of success with us as your partners. We not only advise you on finding and implementing solutions, but also help you with our expert knowledge of standards, safety and sustainability, as well as future-proofing.

Planning

SUSTAINABLE · FUTURE-PROOF · INDIVIDUAL

We can work with you to analyse the building requirements and your needs in order to find the best possible solution. We consider standards & regulations, energy efficiency, technology, digitalisation, comfort and your ideas regarding design and equipment.

Construction

SAFETY · TIME · COST

Our certified processes and quality criteria at every stage of installation mean you can rest assured of the compliance of your plans. Our unique installation method inside the shaft saves time and money and reduces the need to coordinate with other tradespeople.

Operation

AVAILABILITY · ACCESSIBILITY · EXPERTISE

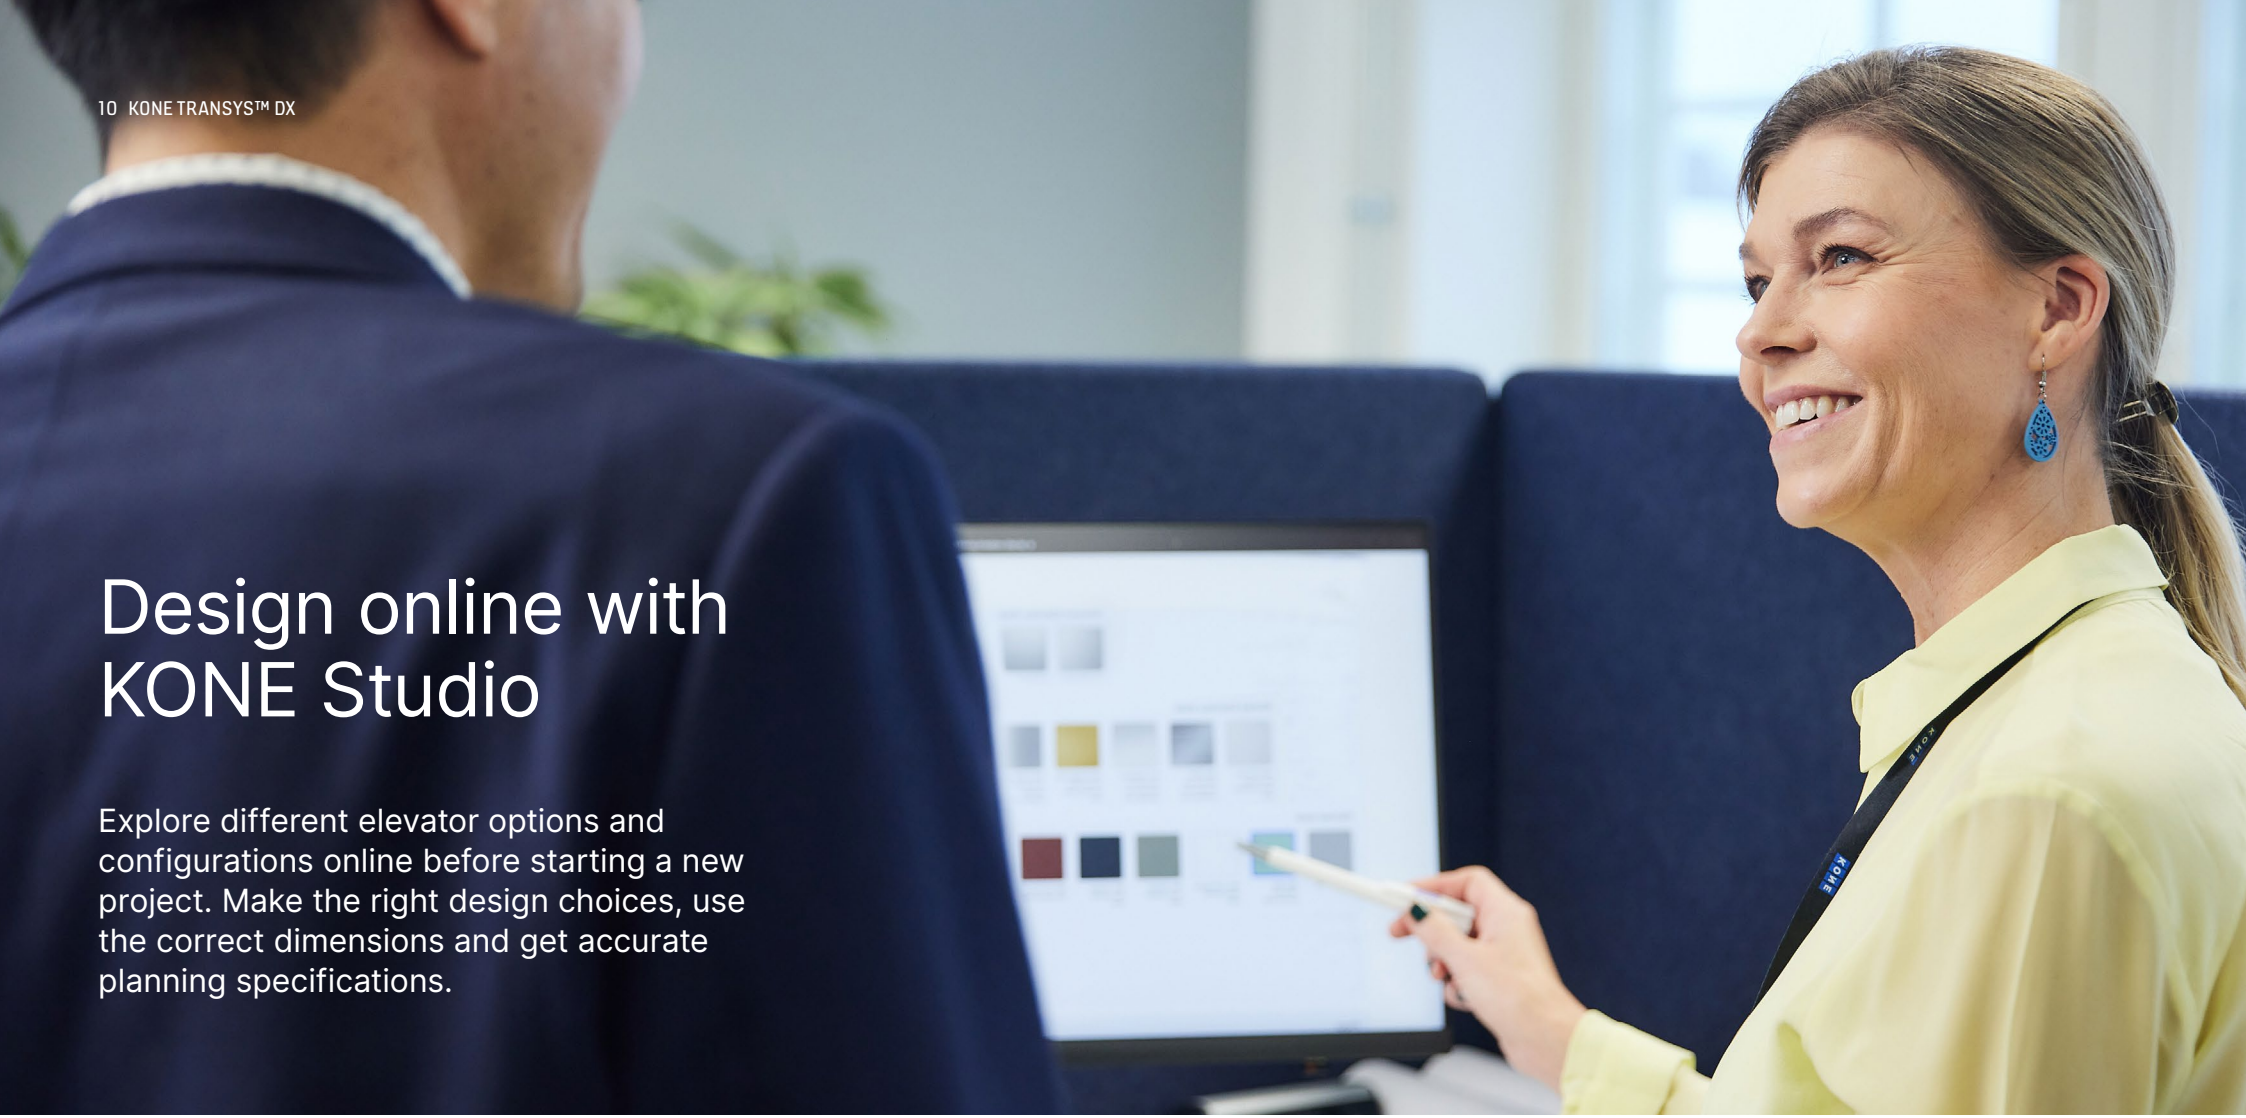

We can assist with the commissioning and operation of the systems. Our services are modular in structure and can be used digitally. We guarantee availability and safety and can be reached 24 hours a day / 365 days a year.

KONE Studio

Get all the technical data you need in one easy-to-use tool, including downloadable CAD and BIM models, as well as detailed elevator specifications.

Design online with KONE Studio

Explore different elevator options and configurations online before starting a new project. Make the right design choices, use the correct dimensions and get accurate planning specifications.

Design with 3D visuals

Find the look you love with a simple, easy-to-use and free online design tool.

Use exact building specifications

Optimize planning with accurate and always up-to-date product data.

Save project details

Test and finalize your custom designs, then make changes later if needed.

Export CAD and BIM drawings

Identify potential issues and plan ahead to avoid surprises during construction.

KONE provides innovative and eco-efficient solutions for elevators, escalators, automatic building doors and the systems that integrate them with today's intelligent buildings. We support our customers every step of the way: from design, manufacturing and installation to maintenance and modernization. KONE is a global leader in managing the smooth flow of people and goods throughout buildings. This makes us a reliable partner throughout the life cycle of buildings. We are fast, flexible, and we have a well-deserved reputation as a technology leader, with such innovations as KONE 24/7 Connected Services and KONE UltraRope®. KONE employs over 63,000 dedicated experts to serve you globally and locally.
